

Basel III disclosures of the Indian Branches for the period 30th June 2019

All amount in Rs.' 000s, unless otherwise stated

DF 2: Capital Adequacy

Qualitative Disclosures

The Bank has assessed its capital requirement taking into account the 3 main risks as defined by Pillar 1 of the Basel III norms viz: Credit Risk, Market Risk and Operational Risk. The Credit Risk is computed using the Standardised Approach, the Market Risk is calculated using the Standardised Duration Approach and the Operational Risk is calculated using the Basic Indicator Approach. The risk computation under each of these 3 categories is adequately covered by the Capital of the Bank.

The Bank has assessed its future capital requirement and the same has been documented in the ICAAP (Internal Capital Adequacy Assessment Process). The capital requirement will be re-assessed taking into consideration the position of the Bank for the period 30th June 2019.

The existing level of Capital is adequate to meet the Bank's current and future business requirements and the CRAR ratio of the Bank is significantly higher than that prescribed by the regulators. A summary of the Bank's capital requirement for credit, market and operational risk and the capital adequacy ratio as on 30th June 2019 is presented below:

DF 3: Credit risk: general disclosures

Qualitative Disclosures

Credit Risk has been defined as the risk of financial loss if counterparty defaults on an obligation under a contract. It arises mainly from direct lending, off-balance sheet exposures such as guarantees and from the Bank's investments in debt securities.

Strategy and processes (including credit risk management policy of the Bank)

The credit risk management framework is based upon Societe Generale group policies and revolves around certain key principles

- All transactions and facilities must be authorized in advance.

- All requests for authorizations relating to a specific client or client group are handled by a single operating division.
- All authorizations are given by an independent risk department, and approval rests on a framework based on internal counterparty risk ratings, Loss given default and a risk-adjusted return on capital analysis
- There are internal caps on the total sub-investment grade exposure (defined as internal rating of 6 (six) or below), exposure to sensitive sectors and on the extent of unsecured exposure.
- There are also specific controls on exposures to banks and financial institutions, designed to ensure against excessive risk concentration.

Structure and Organization:

The risk ratings are provided by operating divisions and are validated by the risk officers. The Risk department is independent of the operating divisions. The local Risk department was separated from Credit department in December 2011. Risk ratings are included in all credit proposals and are factored into all credit decisions. These ratings are independently validated by respective Risk Divisions in Head Office or Regional Hubs.

There is a specialized and centralized department for financial institutions which is located in Paris.

Scope and nature of risk reporting and measurement:

The internal rating models measure counterparty risk (expressed as a probability of default by the borrower in one year) and transaction risk (expressed as the amount that will be lost should a borrower default). An in-house database stores all credit limits.

The risk on counterparty exposure on market transactions is measured by modeling the future mark to market value of transactions, after taking into effect netting and correlation effects.

Non-performing advances:

Non-performing advances are identified by regular appraisals of the portfolio by management or in accordance with RBI guidelines, whichever is earlier. Specific provision is made on a case by case basis, subject to minimum provisioning levels prescribed by RBI. Special attention is paid to early identification of problem exposures. The Bank’s approach towards problem exposures is:

- Quick identification and isolation of potential weak /non-performing credits for concentrated attention through inclusion in the watch list. Watch list discussions are attended by Senior Management, Head of Risk and the Relationship Manager.
- Continued and rigorous follow up of these credits with the intention to monitor a possible turnaround or an early exit.
- A structured and sustained pro-active approach complemented by a rigorous follow up procedures.

For recognition of past due and impaired loans and advances, the Bank follows guidelines prescribed by Reserve Bank of India as contained in circular DBOD.No.BP.BC.1/21.04.048/2013-14 dated July 01, 2013 on “Prudential norms on Income Recognition, Asset Classification and Provisioning pertaining to Advances” and other circulars/notifications issued by RBI during the course of the year in this regard.

As at 30th June 2019	46,868,767	84,816,917	131,685,684

1. The above amounts represent exposures before credit risk mitigants.
2. For non-fund-based exposures, credit risk exposures or equilents are computed as under:

- In case of exposures other than FX and derivatives contract, credit equivalent is arrived at by multiplying the underlying contract or notional principal amount with the credit conversion factors prescribed by the RBI under the Basel II/III capital framework.
- In case of FX and derivative contracts, credit equivalents are computed using the current exposure method which includes two steps as under;
 - Computation of current credit exposure, which is sum of the positive Mark to Market (MTM) value of the outstanding contracts.
 - Potential future credit exposure(PFE) which is determined by multiplying the notional principal amount by the relevant add-on factor based on tenor and type of underlying contracts.

DF 4: Credit risk: disclosures for portfolios subject to the standardized approach

Qualitative Disclosures

The Bank relies on the ratings given by the following External Credit Rating Agencies (ECRAs) approved by the RBI to calculate its capital requirement under the standardized approach for credit risk

Domestic Credit Rating Agencies for external ratings of Indian Corporates:

- 1) Credit Analysis and Research Ltd. (CARE)
- 2) CRISIL
- 3) India Ratings & Research Private Limited (earlier known as FITCH India)
- 4) ICRA Ltd, Brickwork Ratings India Pvt. Ltd., SMERA Ratings Limited

The Bank has used issue-specific solicited ratings available in the public domain (for both Long Term and Short Term facilities) from the above domestic rating agencies to allocate appropriate risk weighting for both funded as well as non-funded exposures on corporate customers.

The mapping of external credit ratings and risk weights for corporate exposures is provided in the tables below:

Risk weight mapping of long term corporate ratings

Long term ratings	Risk weights
AAA	20%
AA	30%
A	50%
BBB	100%
BB & Below	150%
Unrated	100%

Risk weight mapping of short term corporate ratings
