#### Branch activities

Societe Generale Hong Kong Branch ("the Branch") is a branch of Societe Generale ("the Bank"), a bank incorporated in France, and accordingly has no separate legal status or existence. The Branch is registered under the Hong Kong Banking Ordinance ("the Ordinance") as a full licensed bank. During the year, the Branch was principally involved in lending, deposit taking activities, derivative trading activities, foreign exchange spot and forward market activities. The Branch had a positive performance derived from the core operating activities for the year of 2021.

#### SECTION A - HONG KONG BRANCH INFORMATION - continued

#### LIQUIDITY - continued

The current year ended liquidity maintenance ratio reflects the average position of each quarter and is calculated as the arithmetic mean of each calendar month's average value as reported in the Return of Liquidity Position submitted by the Branch to the Hong Kong Monetary Authority pursuant to section 63 of the Ordinance.

The core funding ratio reflects the average position of each quarter and is calculated as the arithmetic mean of each calendar month's average value as reported in the Return of Stable Funding Position submitted by the Branch to the Hong Kong Monetary Authority pursuant to section 63 of the Ordinance.

#### Liquidity risk management

Liquidity risk is the risk that the Branch cannot meet its current contractual and contingent obligations. To manage liquidity risk, the Branch has established a liquidity risk management framework which is in line with the Group's framework and approved by the Branch's management. Such framework is documented in the Branch's liquidity risk management policy which is reviewed at least annually, and is consistent with the SG group's liquidity management.

## Liquidity Risk Management Governance in SG HK Branch ("SG HK")

#### **ALCO**

SG HK holds an Asset & Liability Management Committee ("ALCO") on a quarterly basis and liquidity topics are monitored via this ALCO. General objective of the ALCO is to monitor the structure and growth of balance sheet, review the structural risks and liquidity risk. SG HK ALCO also monitors the liquidity risk tolerance and liquidity targets. The ALCO is chaired by the Chief Executive of SG HK with representatives from Treasury, Business Lines, Finance and Risk functions.

#### Treasury

Treasury function is responsible for operational management of SG HK's liquidity position, both in business as usual conditions and in crisis situation. The goals and objectives of the function are to provide funding to various business lines while optimizing the cost of liquidity, maintain adequate liquidity in both normal and stress periods, ensure compliance of regulatory ratios and internal limits. Its activity is governed by Group Treasurer and dedicated mandate accompanied by limits set by Risk function and in the respect of the local liquidity framework set by the ALCO.

### Liquidity Risk Monitoring in SG HK Branch ("SG HK")

#### <u>Oversight</u>

SG HK has implemented adequate governance and management information systems to ensure compliance with regulatory ratios and internal limits on liquidity metrics. Management oversight has been put in place.

#### Funding diversification

SGHK Treasury raises liquidity in the short-term markets with various short-term investors (e.g. central banks, supranationals, interbank counterparts, corporate clients, etc) to preserve a diversification of resources. In order to ensure activities are adequately funded, Treasury is framed at Group level with diversification indicators such as maturity bucketing, type of investors outstanding, single name concentration, etc. In doing so, the desk manages a safe liability profile, according to the Group's risk appetite and regulatory requirements.

#### LIQUIDITY - continued

#### Liquidity Risk Monitoring in SG HK Branch ("SG HK") - continued

Internal stress testing

The objective of internal stress testing is to ensure sufficient liquidity for the Branch under an adverse scenario combining market and idiosyncratic stresses over the survival horizon established for SG HK. SG HK has used the SG Group's assumptions and methodology for stress testing. The results of stress testing are reported to the ALCO.

Contingency Funding Plan ("CFP")

SG HK has its own CFP, which is reviewed annually, is approved by the ALCO and is communicated to the Group Treasurer.

SG HK's CFP establishes a comprehensive remediation framework for identifying and governing contingency actions in case of liquidity crisis, in accordance with the liquidity crisis framework of the SG group. The CFP designs an appropriate escalation procedure based on Early Warning Indicators, defines criteria to trigger the CFP and the management of liquidity crisis with proper governance for alternative funding source. In particular, the trigger of SG HK's CFP is immediately communicated to the Group Treasurer.

## Liquidity Risk Profile in SG HK Branch ("SG HK")

Funding structure

SG HK develops its own sources of funding and benefits from the parent for funding, in particular with long-term maturities.

The funding sources of SG HK are composed of the following:

mismatch	N.A.	(26,241)	(26,292)	(29,598)	N.A

The negative contractual maturity mismatch is attributable to off balance sheet obligations which are mainly comprised of loan commitments, guarantees and other contingent liabilities. They are reported in the shortest maturity buckets on a conservative approach given no specified drawdown date. In practice, short term cash inflows and outflows broadly match as not all of the loan commitments and the obligations would have been drawn at the same time.

<sup>&</sup>lt;sup>2</sup> The disclosed figures are from the HKMA banking return of Liquidity Monitoring Tools MA(BS)23.

<sup>&</sup>lt;sup>3</sup> Total amount includes derivative contracts reported at replacement cost whereby the contractual cash flows of these contracts were allocated to the respective maturity buckets.

#### SECTION B - BANK INFORMATION (CONSOLIDATED BASIS)

The information set out below is based on the most recent consolidated accounts for the Bank as a whole as at 31 December 2021 and 31 December 2020.

#### PRUDENTIAL CAPITAL RATIO

	31.12.2021 %	31.12.2020 %
Core Tier 1 ratio	13.7	13.4
Tier 1 ratio	15.9	16.0
Total capital ratio	18.9	19.2

The solvency ratio (Basel 2.5 solvency ratio) complies with the calculation methods established by the French Prudential Supervisory Authority. This ratio is based on the Bank's consolidated banking activities, thus eliminating the contributions of the insurance entities.
